

This cartridge is mounted on a three point spacer that prevents the mounting hardware bolts damaging the internal fine wires. The spacer **MUST** be used when mounted in this packaging.

Never use different mounting hardware.

ania

ALWAYS
fit the spacer when
repackaging.

The spacer is not required when fitting to the tonearm. The third point fixing shim (included) is only required for older Rega tonearms.

Avoid touching the stylus or cantilever. Incorrect mounting hardware will destroy the internal wires. Always ensure the correct playing weight is set. For best performance, use a Rega torque wrench for fitting the cartridge. Always turn off the amplifier when connecting a cartridge. Ensure the cartridge is wired correctly.
