Introduction

The AS901 and AS125 Premium Amplifier Stands were designed from the ground up to be worthy of housing your high-end, premier McIntosh Power Amplifiers. These Amplifier Stands -- with their beautiful grain structures, sleek black finishes, and acrylic face plates with backlit McIntosh logos -- will not only visually complement your audio equipment, but paired with McIntosh Power Amplifiers such as the MC901 or MC1.25KW, they will provide you with a viewing experience that lives up to the high expectations you have for your McIntosh listening experience. The AS901 and AS125 Amplifier Stands were built from the strongest, finest Solid Ash Wood, so you can rest assured that you can enjoy this visual and audio splendor for years and years to come.

Power Control (Logo Backlight)

Note: Your Amplifier Stand logo backlight can illuminate when your audio equipment powers on. To do this, connect a cable to the Power Control port in the rear of the stand using the cable and connector described here.

Power Control and Trigger Connectors

The Power Control Trigger Output Jacks sends and receives Power On/Off Signals (+12 volt/0 volt) when connected to other McIntosh Components. An additional connection is for controlling the illumination of the Power Output Meters on McIntosh Power Amplifiers. A 3.5mm stereo mini phone plug is used for connection to the Power Control, Trigger and Passthru Outputs.

Main, Trig 1&2 and Pass-Thru

Packing Your Amplifier Stands

In the event it is necessary to repack the equipment for shipment, the equipment must be packed exactly as shown. Failure to do so will result in shipping damage. Use the original shipping carton and interior parts only if they are all in good, serviceable condition. If a shipping carton or any of the interior part(s) are needed, please call or write to the Customer Service Department of McIntosh Laboratories. Please see the Part List for the correct part numbers.

Part List

Quantity	Part Number	Description
