260D CD Transport/ Optional DAC

The MOON 260D CD Transport with optional 32-bit DAC is the next evolutionary step in combining high-performance, useful features, CD playback and music streaming into one chassis. Borrowing much of its technology from the more exotic and costlier 650D, the 260D offers superb flexibility as a result of being a CD Transport and a DAC all-in-one. Regardless of the music source you are listening to, the MOON 260D will reproduce your music with high resolution and superb musicality.

- Proprietary CD drive system mounted on our M-Quattro gel-based 4-point floating suspension for vibration damping, allowing ambient and spatial cues in your recordings to come to life like never before.

- Two (2) digital outputs – S/PDIF and AES/EBU.

With Optional Digital-to-Analog Converter:

- True 32-bit asynchronous Digital-to-Analog converter.
- 4 digital inputs (S/PDIF x 2, TosLink x 1 and USB x 1) allowing for a connection to virtually any digital source.
- USB input with galvanic isolation.

Specifications

THD @ 1 kHz, 0dBFS (A-weighted)	0.005 %
Intermodulation distortion	0.005 %
Dynamic Range	120 dB
Signal-to-noise Ratio	120 dB @ full output
Channel Separation	116 dB
Shipping weight	16 lb / 7.5 kg
Dimensions (width x height x depth)	16.9 x 3.4 x 13.1 in 42.9 x 8.6 x 33.3 cm

Intrinsic Jitter	1 picosecond RMS
Analog Output @ 0dBFS	2.0V
Analog Output impedance	75Ω
PCM Bit-depth range	16 - 24 bits
PCM Sampling Frequency rates	44.1 - 192 kHz
Frequency Response (full range)	2 Hz - 100 kHz + 0/-3 dB

Available Finishes Black 2-Tone Silver
